

## An increase in HGH is associated with:

1<sup>st</sup>  
Month

- Improved stamina†
- Increased energy†
- Deeper sleep†
- Vivid dreams†

2<sup>nd</sup>  
Month

- Muscle definition†
- Heightened libido†
- Healthier skin†
- Increased strength†
- Weight loss†
- Improved vision†

3<sup>rd</sup>  
Month

### Months 1 & 2 are heightened†

- Enhanced focus†
- Hair growth†
- Enhanced muscle mass†
- Reduction of PMS symptoms†
- Greater flexibility†
- Healthier nails†
- Improved joint mobility†
- Increase in sexual desire†
- Alleviation in some menopausal symptoms†

4<sup>th</sup>  
Month

### Months 1, 2 & 3 are not only heightened, but also more consistent†

\* Please understand that although results may seem to vanish, your body may be utilizing the HGH hormone for tissue repair. Tests include that the benefits resume with continued use.†

5<sup>th</sup>  
Month

- Significant weight loss†
- Greater improvements in skin texture and appearance†
- Greater skin elasticity†
- Reduction of the appearance of wrinkles†
- Healthier and thicker hair†

6<sup>th</sup>  
Month

### Previous months are heightened even more†

- Diminishing cellulite†
- Improved immune system†
- Diminishing pain and general soreness†
- Wounds healing quicker†
- Greater metabolic output†
- Grayed hair beginning to return to natural color†
- Reduction in LDL cholesterol†
- Normalizing blood pressure†
- Improved of heart rate†

Months  
12+

People are reporting improved benefits even after years of consistent use.

† These benefits are based on the experiences of customers using SOMADERM Gel over the past 15 years.
